

Metalcam aims at being considered as one of the most reliable and professional suppliers in the world for the production of high quality steel forgings, certified by independent tests and product accreditations, what gives an added value to our customers' business and to the people we take care on.

We have been growing since 1907, when Metalcam's mother company was founded as a small local entity in Valcamonica, becoming over time a worldwide entity with such a high expertise everybody is proud of.

Our Know-how is our added value and the regular study of the markets where we operate helps us keeping a global mind, even when we locally act in Italy.

Our employees are our key factor and our moral integrity is the secret to get customers to trust us.

Our personnel is strongly motivated into the respect of the environmental and security policies, also because they actually support Metalcam S.p.A by being active shareholders through the "Lavoro S.p.A.", a management/employees owned society with the 10% of shares.

The **Quality Policy** has been defined by Metalcam General Management and it is in accordance with the following political parameters which are related to Metalcam's scope of supplying forged components (according to drawing), shaped forgings, plates and laboratory tests:

- Consideration of the company's background and accordance of the quality system with Metalcam strategies and goals
- Realization of a Quality System in accordance with ISO 9001:2015 requirements
- Accurate application of the requirements stated by the legislation and the technical regulations - National and International - for the certifying bodies in all fields, as voluntary as well as mandatory, in compliance with UNI CEI EN ISO/IEC 17025 rules
- Commitment in securing proper resources to perform all the activities in order to guarantee a high quality level of the products and services
- Satisfy our customers and respect the legal requirements which need to be applied, aiming at increasing the quality level of the products/services and overcoming customers expectations
- Implementation of the most functioning technical, organizational and procedural solutions, in order to keep and to regularly improve the efficiency and efficacy of the processes which are necessary to perform standard activities
- Commitment in securing the respect of regulations in both environmental and security fields, to guarantee the minor impact on the environment and, in the meantime, the best result on security
- Deep evaluation of the raw material quality and origin, rejecting all the ones coming from the Democratic Republic of Congo and its neighbouring countries, where the local conflicts rouse big concerns on the violation of Human rights for the extraction, treatment and trade of the minerals
- Commitment in monitoring Metalcam suppliers on periodical basis, to keep the supply chain free from raw materials coming from a.m. countries

Breno (BS), 17/01/2019

Mario Cocchi
